

## Meet the Members: Byers & McCurry

It's not all bad news during the current pandemic. One silver lining is the return to New Mexico and NMPCA by Ed Byers and Holden McCurry. Ed & Holden left NM in February 2017 to be closer to family and pursue business opportunities. Missing friends, open sky, plenty of sun and space to roam brought them back last November. You will recall that Ed & Holden have been a ceramics team since 2003. Both are graduates of Auburn University. Both have done post graduate studies in ceramics and fine art painting.

Their sculptures are made using clay slabs, extrusions and pinched forms often combined with mixed media materials. Texture is created using found objects, handmade ceramic stamps and roulettes.

Drawn and painted surfaces incorporate terra sigillata, underglazes, slips, oxides and sgraffito.

Mixed-media works combine original silk-printed photography, wood, wire and clay sculpture into wax surfaces. Please welcome back Ed & Holden by visiting their website: [www.byersmccurry.com](http://www.byersmccurry.com)
